Pseudocode:

1.

```
#include "students.h"

// Constructors/Destructors

students::students()
{
  initAttributes();
}

students::~students()
{
}

// Methods

// Accessor methods

// Other methods
```

```
void students::initAttributes()
{
}
```

2.

```
#include "Reg_website.h"

// Constructors/Destructors

Reg_website::Reg_website()
{
  initAttributes();
}

Reg_website::~Reg_website()
{
}

// Methods

// Accessor methods

// Other methods

void Reg_website::initAttributes()
{
}
```

3.

```
#include "University_databases.h"

// Constructors/Destructors

University_databases::University_databases()
{
  initAttributes();
```

```
}

University_databases::~University_databases()
{
}

// Methods

// Accessor methods

// Other methods

void University_databases::initAttributes()
{
}
```
